

## ADV FTTH Drop Cable Stripper tool

### Product Description:

Dual-port wire stripper is applied to strip sheath of rubber-insulated wire optical cable which size is 3.1\*2.0mm (glass fiber/ steel wire strength member etc.).Fiber diameter is 125um, coating diameter is 250um."V" port at the top uses to peel 250um coating on 125um fiber optic.

### Key Features:

1. Designed by human engineering theory, so you will feel comfortable when grasping.
2. All of cutting ends have precise mechanical tolerance to make operation clean and smooth.

### Notes:

1. Usage temperature:- 20 °C to 50 °C.
2. The jaw should deal with quenching and tempering, you do not need to adjust. The sizes of the jaw have been presetted by manufacturers, prevent fiber being scratched, don't need to re-adjust.
3. Please make strippers in the closed position if you don't use it.
