

Power Partner

***Power for your
camera on the go***

  Two Color Options

Key Features

- ***Specifically designed for your EZVIZ Indoor Battery Camera¹***: Unlike ordinary power banks, the EZVIZ Power Partner relies on a well-thought-out product design and carefully coordinated functions to boost
- ***Large 5,200 mAh battery capacity***: The Power Partner greatly extends the use of your indoor battery camera, so it remains active and reliable even in a busy space without frequent recharging.
- ***Charge anywhere with flexible setup***: The Power Partner can use a magnetic design just like your EZVIZ Indoor Battery Camera, so it can go anywhere near the camera without much trouble. Position the duo wherever you need most protection, without drilling holes or using adhesives.
- ***Charge anytime, even in low current output***: Unlike other chargers that shut off when your camera enters energy-saving status, the Power Partner is specially designed to keep charging even with low current.
- ***Battery level monitoring on the power partner***: The Power Partner, when connected to an EZVIZ battery camera that supports Bluetooth communication, allows users to conveniently check the remaining power through the EZVIZ App.²

Goes anywhere your camera goes, even on vertical surfaces

You can charge your battery camera anywhere inside your home using the Power Partner. It eliminates the hassle of searching for an available power outlet and removing the camera from its installation spot. Both the camera and the power partner come with magnetic design, which allows them to stay tightly attached to metal surfaces, without making any change or damage to your wall.

Always-ready power for easy charging

The Power Partner can quickly charge itself to power your EZVIZ camera for a relatively long period of time.³

1 To enjoy the full features of the Power Partner, we'd recommend you use it with the following compatible model with Bluetooth connections: CB2 4G. The list may grow as we launch more products.

2 Based on EZVIZ Lab's test results under standard conditions, the CB2 4G Battery Camera usually can extend its operating time to about three times its own battery life when connected to the Power Partner. For example, if the camera is in operation for 5 minutes per day (when calculating the total duration of all camera activities, including detection, live viewing, etc.), it can operate for up to 46.3 days when it's initially fully charged and continuously powered by the Power Partner. Actual use may vary based on the frequency of camera activities and other environmental factors. For different battery camera models, the estimate hours of power use may vary.

3 The battery level monitoring feature is not available if the connected camera model does not support Bluetooth communications.

Specifications

CS-PB18-R100-WH

Performance Parameter

Input Parameter	Type-C, 5V2A
Output Parameter	USB-A, 5V1A
Battery Capacity	5,200 mAh
Low Current Output	Supports

General

Discharge Temperature	-10°C ~ 45°C (14°F to 113 °F)
Recharge Temperature	0°C ~ 40°C (32°F to 104 °F)
Cable	0.5M USB-A to Type-C Cable
Product Dimensions	51.6 × 82.9 × 26.85 mm (2.03 × 3.26 × 1.06 inch)
Packaging Dimensions	107 × 102 × 55 mm (4.21 × 4.02 × 2.17 inch)
Product Weight	150g

In the box

- Power Partner
- Power Cable
- Foam Sticker
- Metal Plate
- Screw Kit
- Regulatory Information
- Quick Starting Guide

Certifications

CE / RoHS / REACH
